## Allison McCrady

***" My favorite memory from St. Bernadette is building a "Robinson Crusoe" tree house model. Through that activity, I learned that I like hands-on projects, and I began to develop an engineering mind-set."***

Allie is in her final year at Trine University in Indiana. She will graduate in May with a major in Biomedical Engineering. She plans to attend graduate school and attain a PhD. Allie recently completed a summer Research Experience for Undergraduates (REU) that gave her the opportunity to test materials to see if they might be used in implants or to help repair tissue. She presented her research at the Biomedical Engineering Society (BMES) national conference in Phoenix, Arizona,
